
EXPRESSJET INTERNSHIP PROGRAM

Internships are available each semester in a number of different areas of work from flight operations to maintenance, human resources, and customer service and operation control. The interns will be exposed to regulatory compliance of a FAR 121 airline, gain knowledge of policies and procedures of airline operations and be invited to participate in routine management decisions.

Students must attend colleges and/or universities who have approved internship programs with our airline offering course credits for the semester internship. Western Michigan University qualifies as an approved program.

Flight Operations

- Pilot Hiring
- Flight Training
- Flight Standards
- Safety

Human Resources

- Learn regulations governing airline operations
- Participate in activities associated with hiring airline employees

Maintenance

- Learn the basics of what it takes to maintain aircraft for a regional airline
- Assist in special projects involving maintenance
- Work with senior maintenance personnel

Customer Service

- Assist in special projects involving customer service
- Learn the basics of customer service involvement in the airline
- Participate in customer service activities

Benefits
